NOMI

by Bøunelycke mdd

Bøunelycke mdd was established in 1988. Driven by a microaesthetic approach to design, the studio's mission has been to create products which resonate in concert with the design of nature, furniture, and human spaces. The studio's work is characterized by a minimalist approach with an emphasis and focus.

The ability to challenge and optimize the manufacturing process itself is the hallmark of Bøunelycke mdd's approach to design and production. "It could be full" and "all around it can be done".

Bøunelycke mdd's motto is "Design for the people".

Over the years, this unit has worked with many leading industrial clients because they are impelled. Changes by Bøunelycke mdd grow out of a "Design for the people" approach, which is based on the idea that design is general public's to enjoy. This has resulted in a comprehensive portfolio of products and designs in many fields, ranging from furniture to medical equipment over the years.
