"Fold a sheet of paper, place a bulb behind - and you have a lamp." Although the reality is not that simple, designer Henrik Bønnelycke wants the light to appear as if it is. In terms of shape, Fold is brightly clear, where the selected details and latest LED technology are in focus. The magnetic shade makes the installation simple and the design distinct without visible screws. The light shines up and down, and the three included light patterns change the light based on desire and personal style and are also an element for light dimming.

This lamp is a 10 cm wide miniature version of our traditional Fold lamp which creates new applications. Use Fold in white as orientation light at the lower part of the wall or as a beautiful illuminating piece of art in the bathroom or hallway.
