* If you want to install this light fixture in your bathroom and knowing some countries have extra local installation/safety requirements, always contact your local electrician before installation (eg. France) !

BEST INSTALLATION HEIGHT BETWEEN 2-2,5M

This sketch indicates the area the microwave sensor is functioning the best (distance related to height).

* Please note that microwave sensors generate an electromagnetic (RF) field between transmitter and receiver and create an invisible volumetric detection zone. Be aware that microwave sensors are highly sensitive and can emit a signal that can even travel through glass and thin walls!
