• **Innovative, minimalistic and award winning design**

Space B realises the desire to create an extremely simple lamp in terms of expression. The simple and current design is given a particular twist of pleasant lighting through three different settings for temperature and brightness. An illuminating surprise element which sets new standards for innovative lighting and contributes great functional value. For example, place the pendant over the table where the family gathers for dinner, and use the warm colour temperature, dimming the brightness to a more intimate lighting when there are just two of you, and take advantage of one of the two whiter colour temperatures when reading or doing homework.
