• Modern yet timeless design

Raito is a modern, timeless and extremely beautiful series of designer lamps where simplicity and elegance merge in the best possible way. The design in opal glass gives the series a pleasant, light surface and a soft, diffuse light that is glare-free and undisturbed. Raito contributes to the current design trends in lighting, where the suspension is made of brass and the shade of opal glass in a beautiful combination. Designed by Bønnelycke mdd

The Raito table lamp is ideal as atmospheric and decorative lighting. The very beautiful glass screen is surrounded by a brass frame as a contribution to the current design trends of brass and opal white in the decor. A small but extremely gorgeous and functional detail is the location of the power function on the back of the lamp itself.
